

BKM: Personal Rubbermaid Carts

How does it work?

Each crew member gets their own locking Rubbermaid cart for their personal tools.

How does this benefit the project?

Locking carts keep everyone's personal tools secure at night and eliminate unnecessary travel to and from gang boxes. This way everyone knows where their tools are at all times and does not have to rummage through gang boxes looking for them.

Why is this a Lean Method?

On top of saving time and cutting down on excessive movement the Rubbermaid carts utilize the 5S method. Gang boxes can fill up with tool bags, boxes, and buckets; by organizing everyone's tools there is no wasted time looking for tools or moving tools around to get to supplies needed from the gang box.
